

How to Install your new Water Cooler

1. Remove all packaging and place your cooler in the desired location.
2. Establish your mains water source for connection.
3. Using the compression fitting provided, connect to your water source as follows:

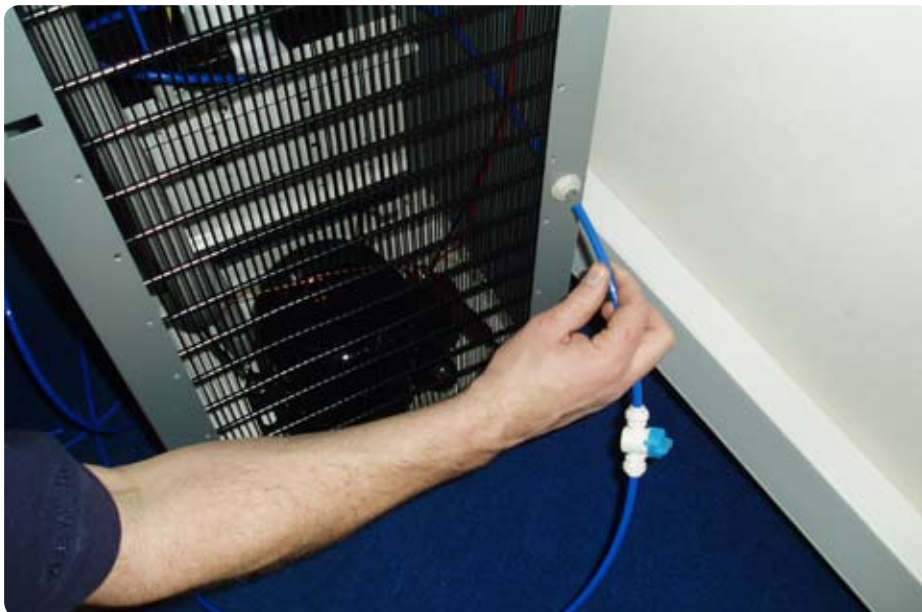

Step 1; Using the plumbing fitting provided connect to the mains as pictured below.

Step 4, Push fit the desired amount of flexi-pipe.

Step 5; Push the flexi-pipe through the hole in the back of the machine.

Step 6, Plug in the electric lead and switch on (**do not switch on the red switch at this stage**)

Step 7, Dispense half a bucket of water using the main button on the front of the cooler (your filter is already fitted).

Step 8; Once flushed thru switch on the red switch and leave to Chill/Heat for 20 mins

Follow the instructions on the card that is supplied with your cooler
